ADVANCE SCHOOL MANAGEMENT SOFTWARE

The School Management System is multi-functional unique software. It can be run on a network to allow other computers to have access. The software has about fifteen different features and shall cater for important activities in your School today and tomorrow.

- **Tired of paper piles and endless spreadsheets?** Introducing ADVANCE, the **multi-functional**, **network-powered** school management software that will **revolutionise** how you run your institution.
- The school management software can be installed locally on a desktop or a laptop, or it can be accessed over the internet.
- The software would be customised for each school with the school name, logo, contacts, and email.
- The software will be installed on the internet for those who prefer the online service and will be provided with a username and password.

- A video tutorial will be provided to guide schools, and where necessary, a tutorial section will be organized for the school.
- Schools should not have to worry about data loss, security, or retrieval of data just in case their computers crash.
- This is because there is an automatic backup system in the software, which ensures that those who buy the locally installed software service insert a permanent pendrive into their machine when using the software. The software backs up data on this pendrive. The system will save the database on it automatically every day.

Imagine:

- **Effortlessly managing every aspect of your school**, from admissions and fees to exams and library loans.
- **Empowering teachers and staff** with a user-friendly interface and **role-based permissions**.
- **Keeping parents informed and engaged** with a **powerful frontend website** and **automated communication tools**.
-

With Advanced All-in-One School Management Software, you get:

- **15+ essential features**, including:

  - **Accounting with reports** for complete financial transparency.
  - **Comprehensive student and staff management** for detailed record-keeping.
  - **Advanced grading and exam systems** for efficient assessment.
  - **Seamless class, section, and routine management** for streamlined scheduling.
  - **Integrated library, transport, and hostel management** for logistical ease.

Beyond the basics, Advanced All-in-One School Management Software offers:

- **Privileged user access** for sending emails, SMS, and announcements.
- **Media sharing** for collaborative learning and engagement.
- **Online exams and assignments** for a modern learning experience.
- **Payroll and fee management** for accurate and efficient financial transactions.
- **Asset management and certificate generation** for increased organizational control.
- **Leave application and reporting** for streamlined HR processes.
- **Complete the online admission portal** for a smooth onboarding experience.

But advanced all-in-one school management software doesn't stop there.

- **Powerful reporting tools** provide invaluable insights for improvement.
- **Customizable settings** adapt the software to your unique needs.
- **Regular updates and support** ensure a future-proof solution.

Stop juggling multiple programmes and manual tasks. Invest in advance and **unlock the full potential of your school**.
